WORK EXPERIENCE

Head Field Solutions Pvt. Ltd. Jul 2026 – Present
AI Full Stack Developer *Noida, India*

- Working on end-to-end development of in-house products and websites, contributing across the complete product development lifecycle.
- Building and integrating frontend, backend, and AI-driven functionality to deliver production-ready web products.
- Contributing to product development from implementation and integration through testing, refinement, and deployment.

PROJECTS

Expense Tracking System | React.js, Node.js, Express.js, MongoDB Jun 2025

- Built a full MERN-stack expense tracking application serving 50+ users, with a React.js frontend and a Node.js/Express.js REST API backend.
- Designed 12+ modular React components for data visualization, filters, and interactive charts using Chart.js.
- Developed a RESTful API handling 500+ expense records with optimized MongoDB aggregation pipelines.
- Integrated automated budget alerts and email notifications using NodeMailer, increasing engagement by 25%.

MeetInsight — AI Meeting Assistant | Python, FastAPI, LLMs, RAG, pgvector Mar 2026

- Architected an end-to-end Generative AI/RAG pipeline transforming raw meeting audio into a searchable knowledge base using LLM-powered semantic search.
- Applied prompt engineering techniques to power LLM-based Q&A over transcribed meeting data, returning context-grounded answers.
- Integrated Faster-Whisper for speech-to-text transcription and Resemblyzer for speaker diarization and voice analysis.
- Built a hybrid retrieval system combining pgvector similarity search with keyword matching, achieving 85%+ retrieval accuracy.
- Designed and deployed 6+ RESTful API endpoints for audio upload, transcription, and LLM inference, demonstrating API design skills transferable to Node.js/Express services.

URL Shortener Platform | React.js, ShadCN UI, Supabase, PostgreSQL Dec 2025

- Developed a full-stack URL shortening service with user authentication, analytics dashboard, and link management.
- Engineered 10+ reusable React components with TypeScript, reducing codebase redundancy by 35%.
- Implemented Row-Level Security (RLS) policies ensuring user-specific data isolation with JWT authentication.
- Analyzed database queries and API caching, reducing redirect time from 750ms to 600ms (20% improvement).

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js, RESTful APIs, JWT Authentication
AI/ML & Generative AI: LLMs, Prompt Engineering, OpenAI, LangChain, Hugging Face, RAG, LLM APIs
Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL
Databases & Storage: MongoDB, PostgreSQL, Supabase, pgvector, MySQL
Tools & Platforms: GitHub, Postman, VS Code, Cursor

EDUCATION

Noida Institute of Engineering & Technology Aug 2022 – May 2026
Bachelor of Technology in Information Technology *Greater Noida, India*

Ewing Christian Public School 2020 – 2021
Senior Secondary (Class XII) *Prayagraj, India*

Ewing Christian Public School 2018 – 2019
Secondary (Class X) *Prayagraj, India*

ACHIEVEMENTS

- Solved 350+ DSA problems across LeetCode, GeeksForGeeks, and HackerRank, strengthening analytical problem-solving skills.
- Ranked among top performers in college coding contests; Runner-up in CodeAthon by Codetantra.

CERTIFICATIONS

- Introduction to Artificial Intelligence — Coursera
- Python for Data Science, AI & Development — Coursera
- Database Management Systems
